

JUDE YANKSON

+233 256980527 | yanksonjude92@gmail.com | <https://github.com/elon-jude>

EDUCATION

Ghana Communication Technology University (GCTU) — Accra, Ghana

BSc Computer Engineering

Relevant Coursework: Data Structures, Computer Networks, Digital Systems, Operating Systems, Python Programming, MATLAB for Engineers, signals and systems, Algorithm and data structure

TECHNICAL SKILLS Languages: Python, C, C++, Python, Flutter

Development & Interest: Web Development, Backend Development, Mobile Development (Flutter), Git (**INTERESTS** Software Development • Embedded Systems • Banking Systems • Technology Innovation • Mobile Development)

Tools: VS Code, GitHub, MATLAB, Android Studio

Other: Problem Solving, Debugging, Software Design

PROJECTS

Tech News App (Flutter) Mobile news application built with Flutter & Dart. Features: Modern UI with image overlays, responsive news feed, and clean Material Design.

GitHub: https://github.com/elon-jude/news_app.git

ATM Simulator (C Programming) Console-based ATM system with persistent storage. Features: account login, PIN verification, withdrawals, and balance checking.

GitHub: https://github.com/elon-jude/Bank_ATM_Project

Password Vault Application (Python) Desktop password manager with GUI. Features: master password protection, JSON data storage, and credential management.

GitHub: https://github.com/elon-jude/Passwordvault_Project

Embedded Systems Projects (Arduino & Raspberry Pi Pico) Microcontroller projects written in C/C++. • Biodata display using loops • Interactive LED blink counter •

Raspberry Pi Pico onboard LED control

GitHub: <https://github.com/elon-jude/Embedded-Systems-Projects>

EXPERIENCE

Backend Developer Intern Bricsky Software Dev Company • Contributed to backend development tasks and software solutions.

Intensive Training / Intern ADB Bank • Completed intensive training program at ADB Bank. • Gained practical exposure to banking systems and technology operations.

Student Software Developer (Projects) • Built multiple programming projects to strengthen software engineering skills. • Practiced web development with HTML & CSS.

- Developed embedded system applications with Arduino and Raspberry Pi Pico.
